LIMESTRONG BUILD STANDARD COLOR

Shell | Base Plaster^[1]

THE LIMESTRONG BUILD COLOR SYSTEM consists of 8 core powdered pigment colors that form the base of the Standard Color Palette. Pigments are sold in single-batch color packs or in bulk, by the pound.

CALCULATION RATIOS. These color/shade (intensity) calculations are based on a ratio of color pigment (by weight, in grams) to a SINGLE bag (32 lbs.) of LSB Finish or single bag (10 lbs.) of limewash. Bag is sized to make a single bucket-batch.

ONLINE CALCULATORS at limestonebuild.com/calculators.html provide the total pigment needed for a given color for the entire job. Mix, apply, and cure a color test batch before beginning finish coat^[1] or order a sample board of this color.

LIMESTRONG BUILD FINISH

Use **0g** (grams): no pigment

A single 32 lb. bag of LSB Finish plaster is sized to make a 5-gallon bucket of ready-to-apply finish plaster.

Benjamin Moore Winter Snow OC-63 | Sherwin-Williams Extra White SW 7006

FOOTNOTES [0]

[1] To see an accurate representation of the final cured color, a sample board of this color is available to order from our website. Otherwise, it is STRONGLY RECOMMENDED that a test batch is mixed and applied to a practice panel and allowed to cure to ascertain the final color result. The color swatches displayed in print or on the website are representative and NOT intended to provide an accurate indication of the final cured color.
